# About GVM Technologies

A trusted partner for AI, automation, software development and digital transformation.

GVM Technologies is a trusted partner in AI, automation, software development, and digital transformation, helping businesses simplify complex processes with secure, scalable, and intelligent digital solutions.

We combine business analysis, UI/UX, software engineering, AI integration, DevOps, and long-term support to deliver practical, reliable, and technically strong solutions for everyday business operations.

Since

2012

Focus

AI+IT

Delivery

Global

Standards

ISO  
Aligned

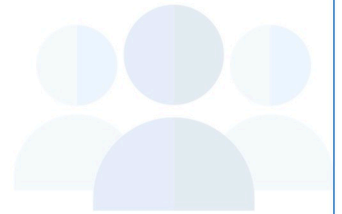

## WHY CLIENTS CHOOSE US

Business-first consulting with secure, scalable, and reliable project delivery.

- ◆ Business-first consulting approach
- ◆ Secure and scalable architecture
- ◆ End-to-end project delivery
- ◆ Reliable deployment and support

## AI + SOFTWARE EXPERTISE

Advanced AI solutions and software development built for business growth.

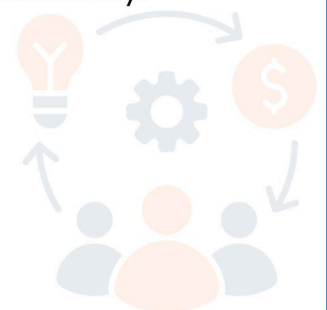

- ◆ AI agents and intelligent automation
- ◆ NLP, machine learning, and computer vision
- ◆ ERP, CRM, and dashboard solutions
- ◆ Web and mobile application development

## ENTERPRISE READINESS

Enterprise-grade systems designed for security, compliance, and scalability.

- ◆ Role-based access and audit trails
- ◆ Reporting and compliance management
- ◆ Cloud deployment and system integrations
- ◆ Backup planning and long-term support

# AI Virtual Receptionist & Calling Agent

Automate inbound and outbound communication with intelligent, human-like AI voice agents.

## 24/7 CUSTOMER COMMUNICATION

GVM Technologies builds AI voice agents that answer calls, qualify leads, book appointments, provide information, create tickets and hand over complex cases to human teams when needed.

- ◆ Inbound call answering
- ◆ Outbound lead follow-ups
- ◆ Meeting booking and reminders
- ◆ Call transcripts and summaries
- ◆ CRM and calendar integration

## Virtual Receptionist

Greets callers, understands intent, answers common questions and routes calls to the right person or department.

## Outbound Calling Agent

Runs follow-ups, appointment confirmations, feedback calls, sales qualification and campaign calls at scale.

## Lead Qualification

Collects name, contact details, requirement, budget, timeline and urgency before assigning to sales.

## Conversation Intelligence

Generates transcripts, summaries, call outcomes and follow-up actions for reporting.

# WhatsApp AI Agent & CRM

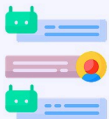

Convert WhatsApp enquiries into structured leads, support tickets, campaigns and customer journeys.

## AI FOR WHATSAPP BUSINESS

Our WhatsApp AI Agent responds instantly, asks relevant questions, shares product/service details, captures customer requirements and updates CRM records automatically.

- ◆ Official WhatsApp Business API integration
- ◆ Automated replies and FAQ handling
- ◆ Human handover for complex chats
- ◆ Lead pipeline and customer history
- ◆ Campaign and broadcast support

### Automated Chat Flow

AI handles first response, lead capture, qualification and requirement discovery without delay.

### CRM Pipeline

Every conversation can be mapped to lead stages, follow-ups, owners and conversion status.

### Campaign Messaging

Send approved campaign templates, reminders, offers, service updates and follow-ups.

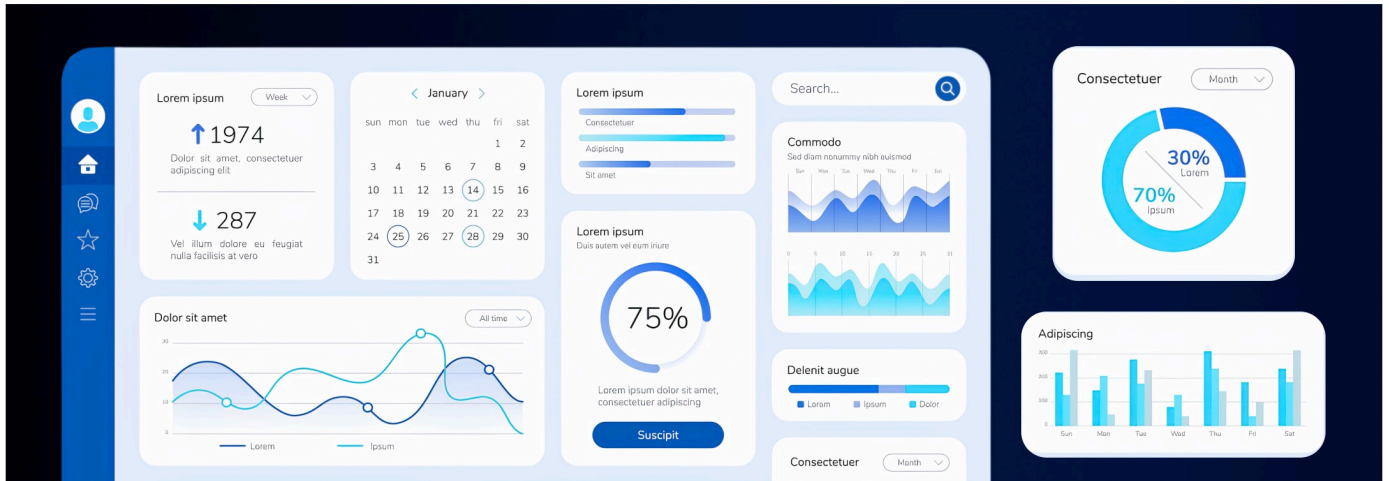

### Analytics Dashboard

Track response time, lead source, hot leads, closed deals and conversation performance.

# AI-Based ERP & CRM

Centralize business operations, customer management, approvals, documents and reporting with AI intelligence.

## BUSINESS OPERATIONS, REIMAGINED

We build custom ERP and CRM platforms that connect departments, automate workflows, reduce manual errors and provide real-time visibility for management.

- ◆ Finance, inventory, HR and procurement
- ◆ Lead, pipeline and customer management
- ◆ Document and approval workflows
- ◆ AI reporting and smart search
- ◆ API integrations with existing systems

### AI ERP

User roles, finance, inventory, procurement, HR, documents, workflows and management dashboards.

### AI CRM

Lead capture, sales pipeline, follow-ups, customer profiles, campaigns and team performance.

### AI Insights

Forecasting, anomaly alerts, report generation, summaries and next-best-action recommendations.

### Integrations

Connect with WhatsApp, email, calling, payment gateways, websites and third-party APIs.

# AI-Enabled Infrastructure & Access Management

Build secure, scalable and AI-ready infrastructure with smart identity, access and monitoring systems.

## SECURE FOUNDATION FOR AI SYSTEMS

GVM Technologies designs cloud, private cloud and in-premise infrastructure for ERP, CRM, AI agents, dashboards and enterprise applications.

- ◆ Cloud and in-premise server setup
- ◆ VPN, firewall and secure access
- ◆ Application deployment and monitoring
- ◆ RFID, NFC, QR and biometric access
- ◆ Audit logs and role-based control

## AI-Ready Infrastructure

Servers, cloud, containers, reverse proxy, SSL, backups, monitoring and scalable deployment.

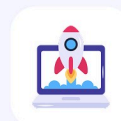

## Smart Access Control

Employee, visitor, vendor and department-level access with RFID, NFC, QR or biometric integration.

## Security Dashboard

Real-time entry logs, alerts, access reports, audit trails and role-based administration.

## Enterprise Deployment

Production-ready setup with secure environments, database controls and support processes.

# Smart Payroll & HR Automation

Automate employee management, attendance, leave, payroll, approvals and HR documentation.

## SMARTER WORKFORCE MANAGEMENT

Our Smart Payroll and HR platform helps organizations manage employees, attendance, leave, salary calculation, payslips, reimbursements and compliance workflows in one system.

- ◆ Employee onboarding and records
- ◆ Attendance and leave management
- ◆ Payroll calculation and approvals
- ◆ Payslip and report generation
- ◆ AI query assistant for HR policies

### Payroll Automation

Salary structure, attendance mapping, deductions, bonuses, reimbursements and payslip generation.

### Attendance Intelligence

Biometric, mobile, geo-fencing, RFID or NFC attendance integration with daily reports.

### HR Documents

Secure employee document storage, expiry alerts, contracts, IDs and compliance files.

### AI HR Assistant

Answers employee queries, summarizes policies and highlights payroll or attendance anomalies.

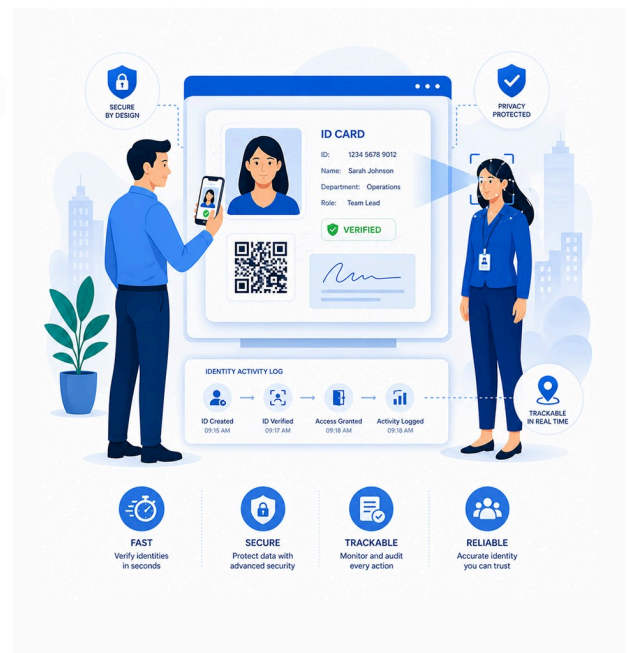

# RFID / NFC Systems & Smart Identity

Digitize access, attendance, assets, inventory, visitor tracking and digital identity using RFID and NFC.

## FAST, SECURE AND TRACKABLE IDENTIFICATION

GVM Technologies develops RFID and NFC-based solutions for organizations that need faster identification, physical tracking, secure access and automated movement records.

- ◆ NFC digital business cards
- ◆ RFID attendance and access cards
- ◆ Asset and inventory tracking
- ◆ Gate pass and visitor tracking
- ◆ Warehouse and vehicle movement logs

### NFC Digital Cards

Tap-and-share business profiles, QR links, wallet-ready cards and contactless identity experiences.

### RFID Operations

Attendance, gate entries, warehouse movement, asset tagging and inventory automation.

### Smart Visitor Pass

QR or NFC visitor passes with approval, entry logs, host notification and security tracking.

### Asset Visibility

Track assets, devices, inventory and movement history across locations and departments.

# Smart Traffic & Agriculture AI Solutions

Sector-specific AI platforms for government, public infrastructure, agriculture and smart city transformation.

## SMART TRAFFIC MANAGEMENT

AI-powered traffic systems can analyze vehicle density, monitor violations, support control-room dashboards and generate data-driven recommendations for traffic planning and public safety.

- ◆ Vehicle detection and density analysis
- ◆ ANPR and violation monitoring integration
- ◆ Signal timing recommendations
- ◆ Incident and congestion alerts
- ◆ Historical reports for city planning

## AGRICULTURE ERP & APP

Our agriculture ERP and mobile app solutions help digitize farmer records, scheme applications, field officer operations, crop advisory, soil health records, inventory and department-level dashboards.

- ◆ Farmer registration and Aadhaar-based verification support
- ◆ Scheme application and tracking
- ◆ Weather and crop advisory
- ◆ Field officer mobile app
- ◆ Admin dashboard and analytics

# Implementation Approach

From business requirement to production deployment, GVM Technologies provides end-to-end AI solution delivery.

## DISCOVERY

- ◆ Understand business goals, workflows, users, integrations, and success metrics to align solutions, improve efficiency, and measure overall business performance.

## PLANNING

- ◆ Define system modules, AI scope, technical architecture, data flow design, project timeline, and delivery roadmap to ensure structured implementation, scalability, and successful deployment.

## DESIGN

- ◆ Design clean, intuitive UI/UX prototypes for web dashboards, mobile apps, and admin portals, ensuring usability, consistency, accessibility, and modern visual design.

## DEVELOPMENT

- ◆ Build secure, scalable applications with well-designed APIs, optimized databases, and reliable third-party integrations to ensure performance, security, and extensibility.

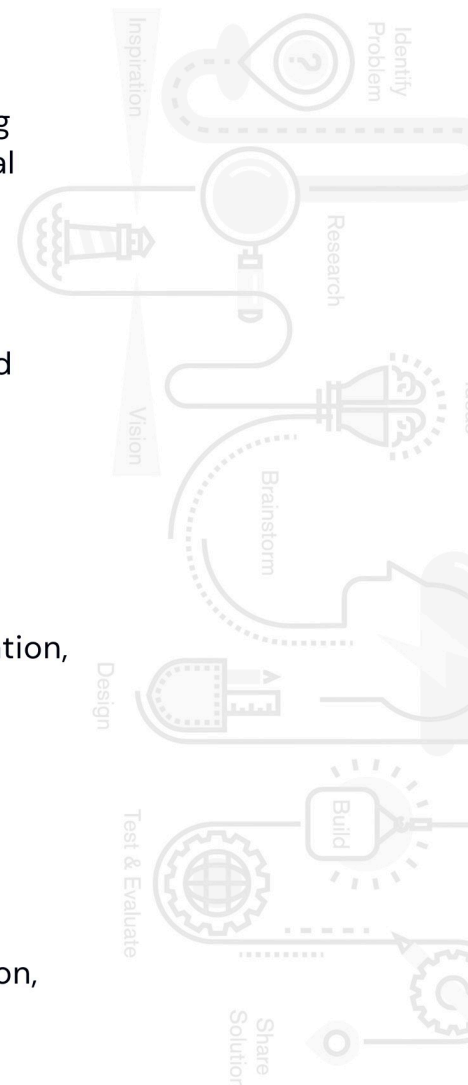

## AI INTEGRATION

- ◆ Implement AI agents and solutions using NLP, automation, analytics, prediction models, and computer vision to enable intelligent decision-making and process automation.

## DEPLOYMENT

- ◆ Deploy solutions on cloud, dedicated servers, private cloud, or client infrastructure with proper configuration, monitoring, and ongoing support for reliability and scalability.

# LET'S BUILD YOUR AI FUTURE

Automate communication, modernize operations, digitize workflows and build industry-specific AI platforms.
